

## CODEBREAKER STAGE PLOT

### Here's what we need;

5 Vocal mics as shown

5 Direct boxes (DJ needs 1-left output, 1-Right output, and 1 for vocoder.

1 for Guitar (he goes direct). 1 for the lead singer's vocoder)

Bass Amp. - SVT, Red Head, or equivalent. (We need volume & bottom end)

Bassist prefers that amp is mic'ed.

Guitarist needs his own POWERED monitor or at least his own separate monitor mix. This is his 'amp'.

If possible dj needs his own mix too, but this is not as critical.
